Product Description

Area Scan Camera

CS Series GigE Area Scan Camera	6
CS Series USB3.0 Area Scan Camera	10
CU Series GigE Area Scan Camera	12
CU Series USB3.0 Area Scan Camera	14
CH Series GigE Area Scan Camera	16
CH Series USB3.0 Area Scan Camera	18
CH Series 10GigE Area Scan Camera	20
CH Series Camera Link Area Scan Camera	22
CH Series CoaXPress Area Scan Camera	24

Line Scan Camera

CL Series GigE Line Scan Camera	28
CL Series Camera Link Line Scan Camera	30

Board Level Camera

CB Series GigE Board Level Camera	32
CB Series USB3.0 Board Level Camera	34

Industrial Infrared Camera

Smart Camera

SC2000E Series Vision Sensor	38
SC3000 Series Vision Sensor	40
SC5000 Series Smart Camera	42
SC7000P Series Smart Camera	46

Smart Code Reader

ID2000 Series Smart Code Reader	50
ID3000 Series Smart Code Reader	54
ID5000 Series Smart Code Reader	56
ID6000 Series Logistics Code Reader	58
ID7000 Series Logistics Code Reader	60
PD Series Logistics Code Reader	62
IDH Series Handheld Smart Code Reader	64

3D Camera

Line Laser 3D Camera	66
RGB-D smart stereo camera	68

Vision Controller

VB2000 Series Vision Controller	70
VC2000 Series Vision Controller	72
VC3000 Series Vision Controller	74

Frame Grabber

Lens

HF-E Series (1/1.8" 6MP)	84
HF-P Series (1/1.8" 10MP)	86
MF Series (2/3" 8MP)	88
KF-E Series (1.1" 12MP)	90
KF-P Series (1.2" 25MP)	92
LF Series (Large Image Circle Lens)	94

Lighting

Ring-Type Lighting	96
Bar-Type Lighting	104
Linescan-Type Lighting	108
Dot-Type Lighting	112
Light Controller	114

Cable

Data Cable	118
Camera Power Supply & IO Line	118

Industrial Camera Client and Software Development Kit

VM Algorithm Development Platform	121

Hangzhou Hikrobot Co., Ltd.

Hikrobot is a global product and solution supplier specialized in machine vision and mobile robot. Focusing on IIoT, smart logistics and smart manufacturing, we build open cooperation ecosystem, provide service to industry and logistics customers, and commit to continuously promoting the intelligentization and leading the intelligent manufacturing process.

Machine Vision

With efforts in industrial vision sensing application and hardware technology, the company provides customers with leading machine vision products. The products cover industrial camera, lens, vision box, industrial smart camera and related accessory.

Through rigorous EMC, safety and reliability tests, Hikrobot guarantees the high precision, high efficiency and high environmental performance of each product. The machine vision products are widely used in industrial automation sectors such as consumer electronics, semiconductors and logistics, as a part of the vision applications like positioning guidance, measurement, quality inspection, code reading, OCR, etc. They help users to greatly improve productivity, accuracy and stability.

Area Scan Camera

CS Series GigE Area Scan Camera

Key Features

- Second-generation industrial camera, excellent power consumption design.
- A new generation of appearance structure design, support four-sided installation, higher installation accuracy.
- PRO version is embedded with rich functions such as lossless compression, noise reduction, super palette, etc.
- GigE interface, with maximum transmission distance up to 100m (without relay).
- Compatible with GigE Vision V2.0 protocol and GenICam standard, and the third-party software.
- CE, FCC, RoHS, KC certification.

CS Series USB3.0 Area Scan Camera

Key Features

- Second-generation industrial camera, excellent power consumption design.
- A new generation of appearance structure design, support four-sided installation, higher installation accuracy.
- PRO version is embedded with rich functions such as lossless compression, noise reduction, super palette, etc.
- USB 3.0 interface, support USB power supply, body lock screw holes to improve installation stability.
- Compatible with USB3 Vision protocol and GenICam standard, and the third-party software.
- CE, FCC, RoHS, KC certification.

CU Series GigE Area Scan Camera

Key Features

- Low power consumption, stable performance, optional PoE power supply.
- Support software trigger, hardware trigger and free run.
- GigE interface, with maximum transmission distance up to 100m (without relay).
- Compatible with GigE Vision V2.0 protocol and GenICam standard, and the third-party software.
- CE, FCC, RoHS, KC certification.

CU Series USB3.0 Area Scan Camera

Key Features

- Low power consumption, stable performance.
- Support software trigger, hardware trigger and free run.
- USB 3.0 interface, support USB power supply, body lock screw holes to improve installation stability.
- Compatible with USB3 Vision Protocol, GenICam standard, and the third-party software.
- CE, FCC, RoHS, KC certification.

Dimension

CH Series GigE Area Scan Camera

Key Features

- Equipped with excellent image sensor. High dynamic range, superior signal-to-noise ratio and outstanding image quality.
- Implanting powerful ISP algorithms such as bright/dark field correction and lens shadow correction to ensure imaging consistency.
- Class 100 purification process control. Quality control leads in industry.
- GigE interface, with maximum transmission distance up to 100m (without relay).
- Compatible with GigE Vision V2.0 protocol and GenICam standard and seamless connection with third-party softwares.
- CE, FCC, RoHS, KC certification.

CH Series 10GigE Area Scan Camera

Key Features

- Low-power platform, equipped with excellent image sensor. High dynamic range, superior signal-to-noise ratio and outstanding image quality.
- Implanting powerful ISP algorithms such as bright/dark field correction and lens shadow correction to ensure imaging consistency.
- Class 100 purification process control. Quality control leads in industry.
- The highly cost-effective 10GigE high-speed transmission solution is backward compatible with Gigabit network.
- Compatible with GigE Vision V2.0 protocol and GenICam standard and seamless connection with third-party softwares.
- CE, FCC, RoHS, KC certification.

CH Series CoaXPress Area Scan Camera

Key Features

- Low-power platform, equipped with excellent image sensor. High dynamic range, superior signal-to-noise ratio and outstanding image quality.
- Implanting powerful ISP algorithms such as bright/dark field correction and lens shadow correction to ensure imaging consistency.
- Class 100 purification process control. Quality control leads in industry.
- Four-channel CXP-6 or CXP-12 output, ultra-high transmission bandwidth.
- Compatible with CoaXPress protocol and GenICam standard and can be seamlessly connected to third-party software platforms.
- CE, FCC, RoHS, KC certification.

Line Scan Camera

CL Series GigE Line Scan Camera

Key Features

- Support automatic or manual adjustment of gain, exposure time, etc.
- Support customizing ROI, binning, TDI.
- Support multiple trigger modes, including hardware trigger, software trigger and free run mode.
- Support PRNUC and FPNC.
- Multiple ISP algorithms, ensuring the optimal image quality.
- Compatible with GigE Vision and GenICam standard and can be seamlessly connected to third-party software platforms.
- CE, FCC, RoHS, KC certification.

Board Level Camera

CB Series GigE Board Level Camera

Key Features

- Multi-board design. Support flexible installation and configuration.
- Support access to mainstream embedded development boards for quick secondary development.
- Compact structure, bare board, C interface, M12 interface are available.
- GigE interface, support PoE.
- Compatible with machine vision standard protocols and GenICam standard, seamless connection to third-party software platforms.
- CE, FCC, RoHS, KC certification.

CB Series USB3.0 Board Level Camera

Key Features

- Single-board simplified design. Support flexible installation and configuration.
- Support access to mainstream embedded development boards for quick secondary development.
- Compact structure, bare board, C interface, M12 interface are available.
- USB3.0 interface, support USB interface power supply, low power consumption.
- Compatible with machine vision standard protocols and GenICam standard, seamless connection to third-party software platforms.

Dimension

Industrial Infrared Camera

CI Series GigE Industrial Infrared Camera

Key Features

- Using high-sensitivity vanadium oxide uncooled detector, resolution 640×512.
- Provide a variety of pseudo-color modes, rich image adjustment functions.
- Small and structural design that supports installation on four sides.
- GigE interface, with maximum transmission distance up to 100m (without relay).
- Compatible with GigE Vision protocol and GenICam standard.
- CE, FCC, RoHS, KC certification.

Notice:* will be released soon.

Dimension

Smart Camera

SC2000E Series Vision Sensor

Key Features

- Using embedded hardware platform, high-speed image processing can be carried out.
- Implant high-precision positioning and measurement algorithms, which can detect presence, positive and negative, etc.
- Rich IO interface, can access multiple input and output signals.
- Abundant status indicators, real-time grasp of equipment status, convenient for debugging and maintenance.
- The light source lamp cup is ingeniously designed to ensure uniform brightness in the lighting area.
- Small size, no fear of small spaces.
- Support multiple communication modes, such as serial port, TCP, UDP, FTP, EtherNet/IP, Modbus, Profinet, etc.
- CE, FCC, KC certification.

SC5000 Series Smart Camera

Key Features

- Embedded high-performance visual inspection algorithm, strong performance, simple configuration.
- Support semi-automatic focusing, realize the production of multiple sizes of products corresponding to one device.
- Support large-capacity storage, and can selectively store logs and classified pictures in the device.
- A variety of light sources are optional, adapt to different production environments.
- Rich IO interface, can access multiple input and output signals.
- Abundant status indicators, real-time grasp of equipment status, convenient for debugging and maintenance.
- Support multiple communication modes, such as serial port, TCP, UDP, FTP, EtherNet/IP, Modbus, Profinet, etc.
- CE, FCC, KC certification.

SC7000P Series Smart Camera

Key Features

- Built-in vision tools of deep learning to achieve character and object recognition, object sorting, etc.
- Support semi-automatic focusing to realize the production of products in multiple sizes with one equipment.
- Mass storage supported, selectively store device logs and classified pictures.
- A variety of light sources are available for selection to adapt to different production environments.
- Rich IO interfaces provide access for multiple input and output signals.
- Multiple LED indicators indicating realtime status for debugging and maintenance.
- Support multiple communication modes, such as serial port, TCP, UDP, FTP, EtherNet/IP, Modbus, Profinet, etc.
- CE, FCC, KC certification.

■ ID2000 Series Smart Code Reader

Key Features

- Ultra-small structure, suitable for various types of machines and compact workstations.
- Support reading multiple codes, such as Code 39, Code 93, Code 128, CodaBar, EAN, ITF25, QR, DM, etc.
- Design multi-color LED light source, adopt asymmetrical arrangement, and cover more evenly.
- Built-in LED sight, clearly indicating the field of view, quick installation and adjustment.
- Front waterproof debugging button, and support external hands-on trigger.
- Abundant IO interface and direct plug-in power interface, convenient for wiring.

■ ID3000 Series Smart Code Reader

Key Features

- Excellent Sensor, support high-speed acquisition rate with high-quality images.
- Support reading multiple codes, such as Code 39, Code 93, Code 128, CodaBar, EAN, ITF25, QR, DM, etc.
- Adopt multiple IO interfaces for input and output signals.
- Ring indicator light on the top for quick observation of working status.
- External waterproof debugging button, support external manual trigger and one-key settings.
- Bilateral side waistline result indicator, multi-angle visible OK/NG status in code reading.
- Modular light source design, controllable branch and convenient replacement.
- IP67 protection, cope with harsh industrial application environment.

■ ID5000 Series Smart Code Reader

Key Features

- Select 4.9MP-20MP high-performance sensor, high-speed image data acquisition and excellent image quality.
- Support reading multiple codes, such as Code 39, Code 93, Code 128, CodaBar, EAN, ITF25, QR, DM,PDF417, etc.
- Built-in deep learning code reading algorithm. Adapt to a variety of complex working conditions with robustness.
- Optional mechanical focus lens, auto-focusing and easy debugging.
- Support digital scoring of coding level.
- Multifunctional indicator on the top. Support customization and quickly observe the working status.
- Support multiple communication modes, such as TCP/IP, Serial, FTP, PROFINET, Ethernet/IP, etc.

■ ID6000 Series Logistics Code Reader

Key Features

- Provide 20MP and 12MP ultra high resolution, covering a enormous field of view.
- Provide 12MP high-resolution global shutter, adapt to high-speed scenes and provide 4K horizontal resolution.
- Provide logistics-specific deep learning barcode reading algorithms to deal with various types of distortion, wrinkles, dirt, and broken barcodes in logistics scenarios.
- Support multiple barcode recognition and waybill cutout.
- Gigabit transmission, support original image output and archive.
- Support networking, construct multi-code reader system through codemaster.

Specifications

■ ID7000 Series Logistics Code Reader

Key Features

- Adopt high-quality linescan sensor to achieve coverage of more than 1.4m in narrow visual space.
- Built-in deep learning code reading algorithm to efficiently read bar codes of various types.
- Support real-time variable speed adjustment, support the whole image stitch transmission.
- Rich IO functions, support encoder, RS232 serial transmission protocol.
- Optional bottom reflectors of different lengths with reflector cleaning mechanism can be added.
- Support SmartSDK, TCP, UDP, Serial, FTP, HTTP and other communication protocols.

■ PD Series Logistics Code Reader

Key Features

- Integrated structure design of camera lens and light source, high integration, ready to use out of the box, convenient installation and debugging.
- Built-in deep learning code reading algorithm, efficient reading of various logistics barcodes.
- Realize the collection and fusion of images and data; provide local storage and upload, traceability basis.
- Adopt professional optical design, high energy utilization rate, stable performance and long service life of lamp beads.
- Adjustable light source brightness, strong environmental adaptability.
- Seamless docking of common express logistics management system to provide real-time effective data for logistics and production enterprises.

Dimension

■ IDH Series Handheld Smart Code Reader

Key Features

- The self-developed bar code recognition algorithm, efficiently read the mainstream code types.
- Strong robustness, can effectively deal with the situations of dirty bar codes, defects, low contrast and the like.
- Visual laser or LED aiming, clear indication of target field of view, quick installation and adjustment.
- Reliable and durable structural design.

3D Camera

Line Laser 3D Camera

Key Features

- Built-in wide dynamic image processing algorithm and high-precision measurement algorithm.
- Optimized efficiency up to 3m/s.
- High power laser module, wider dynamic range.
- Narrow band filter, stronger anti-interference ability.
- Precise exposure synchronization, stable performance.
- Support the output of volume (length, width, height and integral volume), point cloud and feature coordinate.

RGB-D smart stereo camera

Key Features

- Built-in deep learning algorithm to achieve accurate target positioning and segmentation.
- High energy efficiency laser module with precise exposure synchronization, more stable performance, wider dynamic range.
- Large field of view, suitable for various industrial and logistics applications.
- Support RGB-Depth synchronisation and alignment, which eases secondary development.
- Adopt narrow-band filter, stronger anti-interference ability.
- Provide accurate intrinsic calibration, and support one-key single/multiple camera system calibration.

Vision Controller

VB2000 Series Vision Controller

Key Features

- On-board Intel® E3845 SoC, 1.91GHz CPU.
- 4GB DDR3L memory and onboard SSD of high reliability.
- 3 Intel GigE ports and enhanced anti-surge design to ensure the stable running of the machine vision cameras.
- Supports multiple opto-isolated inputs and outputs.
- Controls the light via light interface.
- Adopts 2 HDMI interfaces and supports independent display.
- CE, FCC, RoHS certification.

VC2000 Series Vision Controller

Key Features

- Adopts Intel® Elkhart Lake processor to provide computing performance.
- Supports 16-channel GPIO and NPN/PNP switching for output.
- Supports 4-channel light source control for good-quality imaging.
- Adopts 4 independent GigE interfaces for high-speed and stable data transmission.
- Adopts built-in USB interface or dongle for on-site maintenance.

VC3000 Series Vision Controller

Key Features

- Adopt desktop-class Intel® CPUs for powerful computing performance.
- Powerful expansion slot configuration to meet the expansion of common image acquisition interfaces for machine vision, with stable performance.
- Support 11-channel GPIO input and output function.
- Adopt Intel GigE network card, ensuring fast and stable data transmission; PoE is available for option.
- Built-in dual USB3.0 dongle interfaces, to ease the setup and maintenance on site.
- Serial port expansion module, light source expansion module and IO expansion module can be installed as needed.

Frame Grabber

Key Features

- Different interface selection, supporting various industrial camera access.
- On-board memory supports image caching for improved data reliability.
- On-board ISP functionality to reduce PC load.
- Rich I/O interfaces, integrated multiple input and output.
- Provide easy-to-use SDK, compatible with genlcam standard.
- CE, FCC, KC compliant.

HF-E Series (1/1.8" 6MP)

Key Features

- Higher image clarity and contrast ratio.
- Ultra-low distortion and higher relative illumination rate.
- Good optical performance at ultra-short working distance.
- Compact design, convenient for device integration.

Dimension

HF-P Series (1/1.8" 10MP)

Key Features

- Ultra-high resolution and consistency of image clarity.
- Bigger aperture, lower distortion and higher relative illumination rate.
- Achromatic optical system design, better imaging performance with color camera.
- Excellent vibration resistance performance, optical axis shifting within pixel level.
- Good stability at high and low temperature.
- Multilayer and broadband coating design, compatible with visible and near-infrared applications.

Dimension

MF Series (2/3" 8MP)

Key Features

- Ultra-high resolution and consistency of image clarity.
- Lower distortion and higher relative illumination rate.
- Achromatic optical system design, better imaging performance with color camera.
- Good stability at high and low temperature and excellent vibration resistance performance.
- Supports ultra-short working distance with good optical performance.

■ KF-P Series (1.2" 25MP)

Key Features

- Ultra-high resolution and consistency of image clarity.
- 1.2" Large image size, large aperture, low distortion, high relative illumination.
- Achromatic design for better imaging with color camera.
- Excellent high/low temperature stability for harsh environments.
- Excellent anti-vibration and anti-impact performance.
- Excellent optical performance at different working distances.

LF Series (Large Image Circle Lens)

Key Features

- 100 million ultra-clear resolution with ultimate precision of 3.1 μm .
- Ultra-high resolution and consistency of image clarity.
- Ultra-low distortion and high relative illumination.
- The maximum image surface coverage is $\varnothing 46\text{mm}$, supporting large sensor size areascan camera and 8K 5 μm linescan camera.
- Optimized optical design for different magnification.
- F mount is detachable, which is convenient to expand other interfaces.

Linescan-Type Lighting

MV-LTDS-H industry linescan-type lighting series adopts high brightness and high power LED, combination of structural heat dissipation and fan heat dissipation, provide good heat dissipation and working life, flexible installation, efficient focusing.

Light Controller

■ Analog, Constant Voltage Series Light Controller

MV-LE100 analog light controller supports infinitely variable brightness and outputting multichannel light sources. It provides trigger input connectors, device management interface, etc. The analog light controller helps users realize fast and convenient deployment of vision light source on site.

Specifications

■ Digital, Constant Voltage Light Controller

MV-LE200 digital light controller supports outputting multichannel light sources and different control modes of light source. It provides I/O connectors, device management interface, and corresponding light source controller software. The digital light controller helps users realize fast and convenient deployment of light source on site.

Specifications

Dimension

Digital Constant Current Light Controller

MV-LE201 digital light controller supports a variety of variable current control mode of light source. It adopts control panel buttons and display screen, and provides serial port or network interface communication. It has features of stable performance and flexible functions. The digital light controller helps users realize fast and convenient deployment of light source on site.

Cable

Data Cable

Key Features

- Rich interfaces and types.
- Including GigE, 10GigE, USB3.0, Camera Link, CoaXPress and more.
- various lengths are available to meet the needs of different scenarios.
- High stability of data transmission.
- Some cables have motion performance, which can support motion scenes such as drag chains and robotic arms.

Specifications

Industrial Camera Client and Software Development Kit

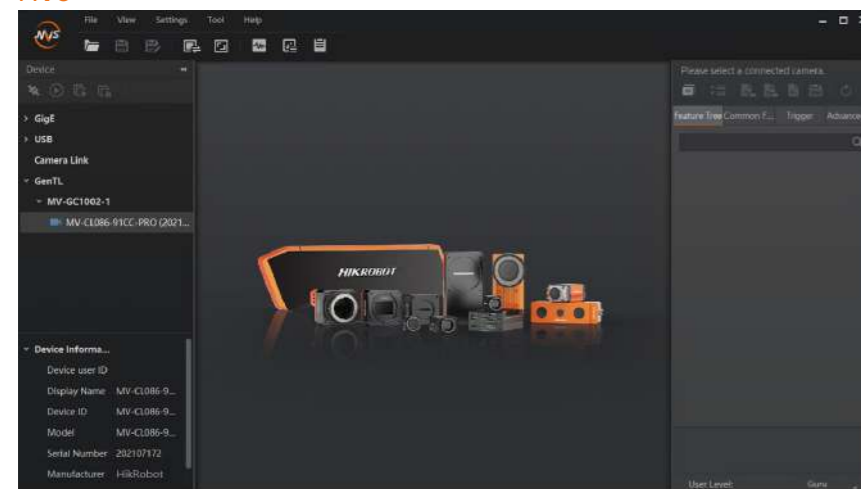

The industrial camera client and software development kit is based on the GenICam standard and follows the GigE Vision, USB3 Vision, Camera Link, and CoaXPress protocols. The user can connect the industrial camera through the client or SDK, collect the camera image, and obtain and set the camera parameters. The software development kit contains SDK and sample programs, which can meet the diverse needs of users for secondary development.

Performance characteristics

- High-performance GEV and U3V drivers improve image data transmission and processing capabilities.
- Provide GenTL standard library to access to industrial cameras, such as CoaXPress interface cameras, greatly reducing the development workload.
- Abundant API interfaces are convenient for users to carry out secondary development quickly and effectively.
- Integrate a variety of ISP algorithms to help users get the most appropriate image through image preprocessing.
- Support the matching access of third-party software and provide DirectShow development kit.
- Diverse sample programs, source code, and development documentation for quick access.
- Provide deep customization of API interface and UI interface
- Provide frame grabber SDK interface library and sample programs to support the control and image collection of GeV, Camera Link, CoaXPress and other self-developed frame grabber.

Supported Platforms	Supported Programming Languages
Windows 32/64bits	C
X86/ARM Linux 32/64bits	C++
MacOS 64bits	C#
Android System	VB.NET
	PYTHON
	Delphi
	JAVA

VM Algorithm Development Platform

Algorithm development platform is a machine vision software independently developed by Hikrobot, which is dedicated to providing customers with algorithm tools to quickly solve vision applications, and can meet machine vision applications such as visual positioning, size measurement, defect detection and information recognition.

Features

- It consists of nearly a thousand completely self-developed image processing operators and a variety of interactive development tools, including 140+ module tools, supporting a variety of operating systems and image acquisition hardware devices, which can meet the needs of positioning, measurement, identification and detection in the field of machine vision applications.
- Fully graphical interactive interface, function icons are intuitive and easy to understand. Dragging operation can quickly set up visual scheme. Module operation status is independently identified and displayed in real time.
- Users can create visual solutions according to their needs, customize the running interface, and integrate background images or company logos on the running interface to meet the personalized needs of customers.
- Compatible with GigE Vision and USB3 Vision protocol standards, allowing access to multiple camera brands. Support local image and camera real-time image processing.
- The secondary development is simple and easy to use. The simplified interface can save 90% of the code. The new tool can be imported into Visual Studio with one key. It supports the interface development of QT, MFC, WPF and WinForm.
- Support the development of user-defined modules. Users can directly drag and use the user-defined algorithm after it is packaged as a VM module.
- Support TCP/IP, ModBus, serial port, UDP, Ethernet/IP and other common industrial communication protocols, compatible with the communication of mainstream PLC models.

Positioning and measuring tools

Accurately and efficiently locate any geometric element in the image with 1/16 pixel accuracy.

- Efficient template matching tool to overcome differences in sample translation, rotation, scaling, and illumination.
- Quickly and accurately find the position of circles, lines, blobs, edges, vertices, and other geometric objects.
- Accurately measure shapes, dimensions, areas, distances, angles, intersections, and other geometric properties.
- It can be used in robot guidance and other vision tools to provide position information and presence information.

Identification tools

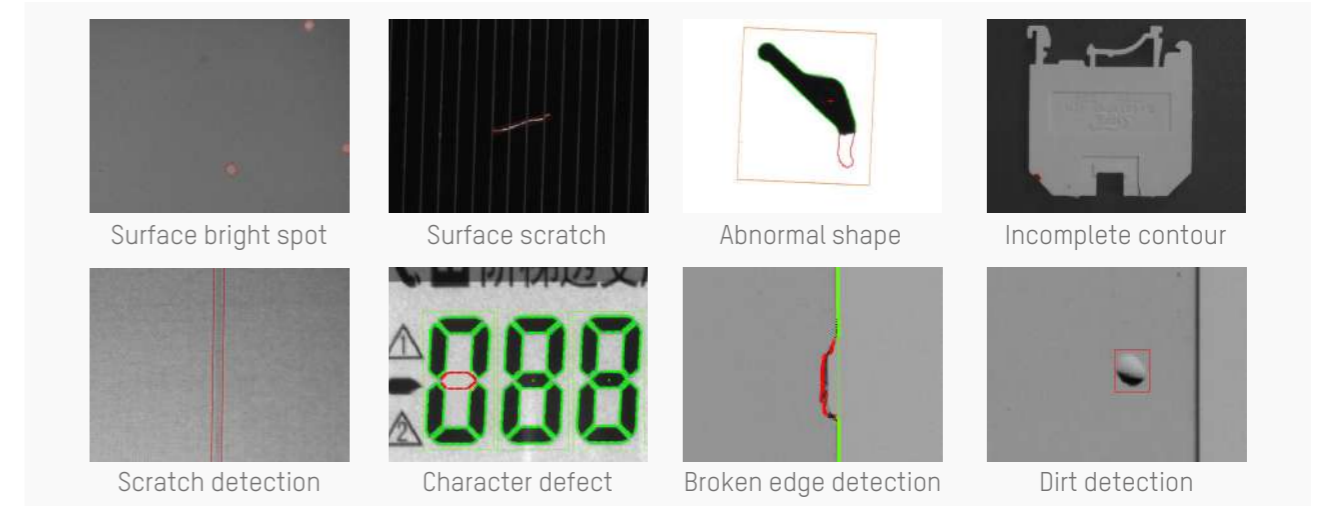

- Fast and accurate reading of digital information code.
- OCR algorithm based on deep learning can adapt to the recognition of complex background, low contrast, deformation and other characters.
- One-dimensional code and two-dimensional code of various types can be identified with different positions, angles and illumination. The influence of image distortion can be effectively overcome.
- Provides continuous, accurate, high-speed reading of ID information for part tracking.
- Support multiple VeriCode accurate identification in case of strong interference.
- It supports CPU and GPU versions of deep learning code reading algorithm, and also carries out accurate positioning and recognition in complex background.

Defect detection tool

Accurately identify defects on the surface, shape and contour of the workpiece.

- Based on deep learning technology, it can detect fine surface scratches and spots, and overcome the interference of surface texture, color and noise.
- Accurate detection of workpiece shape and contour defects, can overcome the interference of burrs, color, noise.
- Reliable tool for comparing standard parts to locate small differences in workpiece.

List of algorithm platform tools

Toolbox	Enumeration Of Tools
Acquisition (5)	Image Source, Multi-Image Acquisition, Image Output, Image Buffer, Light Source
Locating (24)	High-Precision Match, Fast Match, Gray Model Match, Mark Locating, Circle Search, Line Search, BLOB Analysis, Caliper, Edge Search, Position Fixture, Rectangle Search, Peak Search, Edge Intersection, Parallel Line Search, Quadrilateral Search, Line Search Group, Multi-Line Search, Blob Label Analysis, Path Extraction, Find Angle Bisector, Find Median Line, Calculate Parallel Line, Find Vertical Line, Target Tracking
Image Generation (3)	Circle Fit, Line Fit, Geometry Generation
Measurement (10)	Line-to-Circle Measurement, Circle-to-Circle Measurement, Point-to-Circle Measurement, Point-to-Line Measurement, Line-to-Line Measurement, Point-To-Point Measurement, Intensity Measurement, Edge Distance Measurement, Pixel Count, Histogram
Recognition (11)	2D BcR, BcR, OCR, DL Character Recognition G/C, DL Code Reading G/C, DL Character Locating G/C, DL Single Character Detection G/C
Calibration (9)	Calibration Board Calibration, Camera Mapping, N-point Calibration, Translation Calibration, Distortion Calibration, Mapping Calibration, N-image Calibration, Load Calibration, Rotate Calibration
Deep Learning (13)	DI Image Segmentation G/C, DI Classification G/C, DI Object Detection G/C, DI Image Retrieval G/C, DI Anomaly Detection G/C, DI Instance Segmentation G/C, DI Unsupervised Segmentation G
Calculation (11)	Single Point Alignment, Single Point Grab, Single Point Map Alignment, Single Point Rectify, Calibration Transformation, Point Set Alignment, Rotation Calculate, Line Alignment, Scale Transformation, Variable Calculation, Coordinate Transform
Image Processing (20)	Image Processing Combination, Image Morphology, Image Binarization, Image Filtering, Image Enhancement, Distortion Correction, Image Computing, Image Clarity Estimation, Image Fixture, Shading Correction, Image Resize, Affine Transformation, Ring Expansion, Copy Fill, Frame Mean, Normalization, Image Correction, Geometric Transformation, Image Stitching, Multi-image Fusion
Split Combination (6)	Divide Image, 2D Array Correct, Label Filter, Box Merge, Box Overlap, Box Filter
Color Processing (4)	Color Extraction, Color Measurement, Color Transformation, Color Recognition
Defect Detection (13)	OCV, Surface Defect Filter, Arc Edge Defect Detection, Line Edge Defect Detection, Arc-pair Defects Detection, Line-pair Defects Detection, Edge Combination Defect Detection And Edge-pair Combination Defect Detection Respectively, Edge Model Defect Detection, Edge-pair Model Defect Detection, Anomaly Detection, Edge Position Trend Analysis, Edge Pair Position Trend Analysis
Logic Tools (15)	Condition Branch, Condition Detection, Branch, Branch String, Save Text, Logic, Format, String Comparison, Shell, Group, Point Set, Time-consuming Statistics, Data Set, Trigger Module, Graphics Collection
Communication (5)	Receive Data, Send Data, Camera IO(Support TCP/IP, Modbus, UDP, Serial Port, Ethernet/IP And Other Common Industrial Protocols; Support Communication With Mainstream Brand PLC), Protocol Analysis, Protocol Assembly

Applicable Industries

Code Reading

CodePlatform

Hikrobot's CodePlatform is a comprehensive code-reading software platform, including data collection, image processing, communication output, data statistics and other functions. With strong compatibility and rich functions, the platform meets most demands of common code-reading application scenarios.

- **Multi-business scenarios:** Modular software design, high expansion, suitable for multi-business scenarios such as express logistics, pallet access door code reading, and on-site logistics workstations.
- **Rich interface information:** Including real-time information area, picture display area, history record area, menu configuration area, running status display, quick function area, user rights management, etc., rich in information.
- **Product access:** Can access all series cameras such as code reading cameras, volume cameras, panoramic industrial cameras, and support multi-camera combination applications.
- **Convenient data connection:** Supports the upgrade of a separate protocol gateway plug-in, and supports highly customized business output.
