Easy programming

Customized FB/FC, self defined variable, programming assistant...

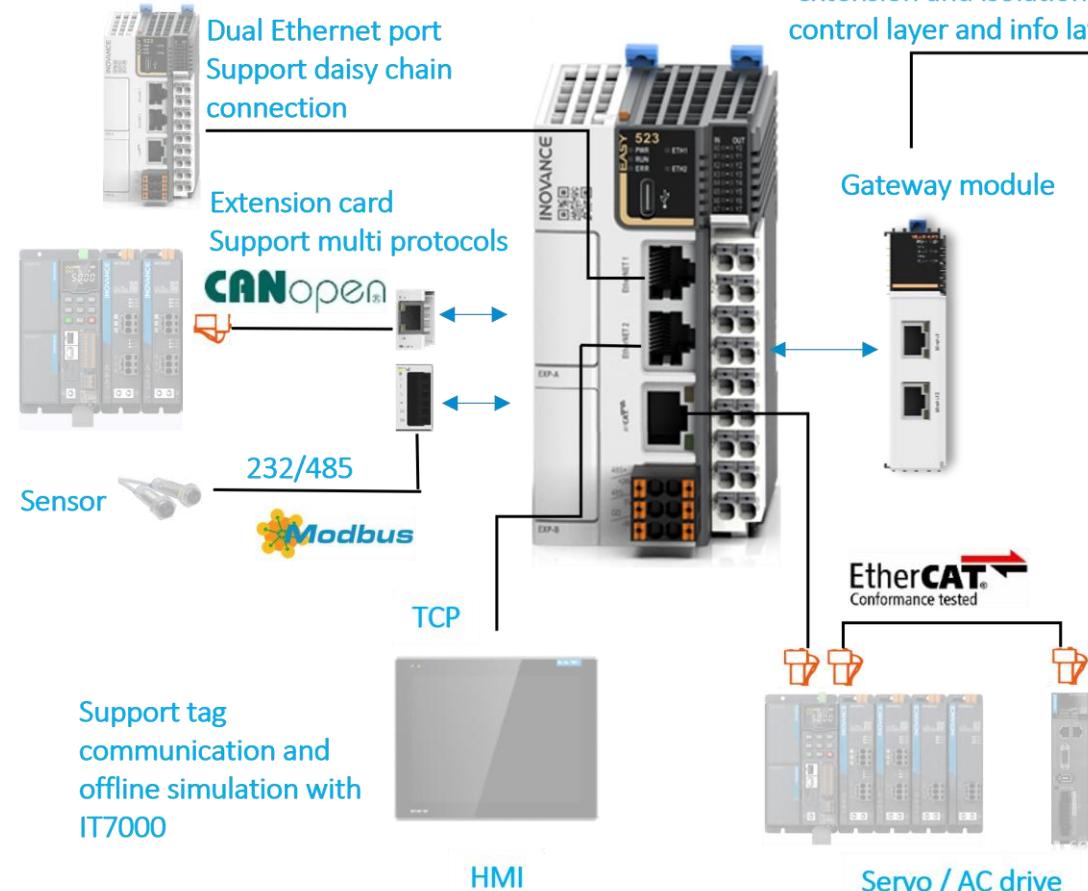

Easy Wiring

Plug directly, spring clamp terminal

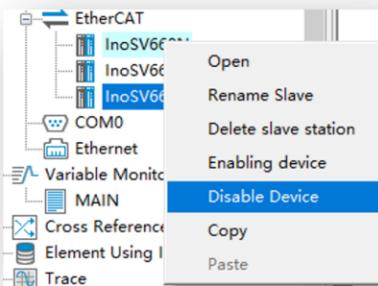

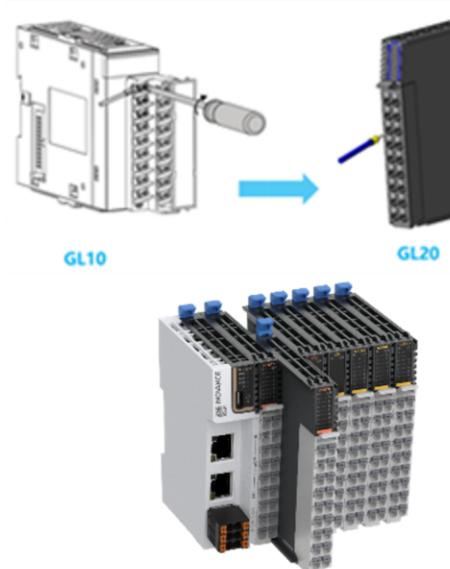

Easy Commissioning

Auto device scanning, easy to configuration, servo debug without programming, offline simulation

- Support customized function block and variable, and the function block can be **reused easily**
- Support **ST** structure text language programming, improve the programming efficiency.
- Support **offline simulation**, debug project without connecting to hardware, and offline simulation with HMI(IT7000)
- Support instruction and variable **input assistance**
- Push-in terminal, wiring **without screw**
- 'Blade type' compact IO extension modules(GL20), plug directly and removable terminal, **fast replacement** efficiency
- Type-C port** work as programming port, support program uploading/downloading and debugging
- EtherCAT slave disable/enable functionality—same program applicable to **different** devices

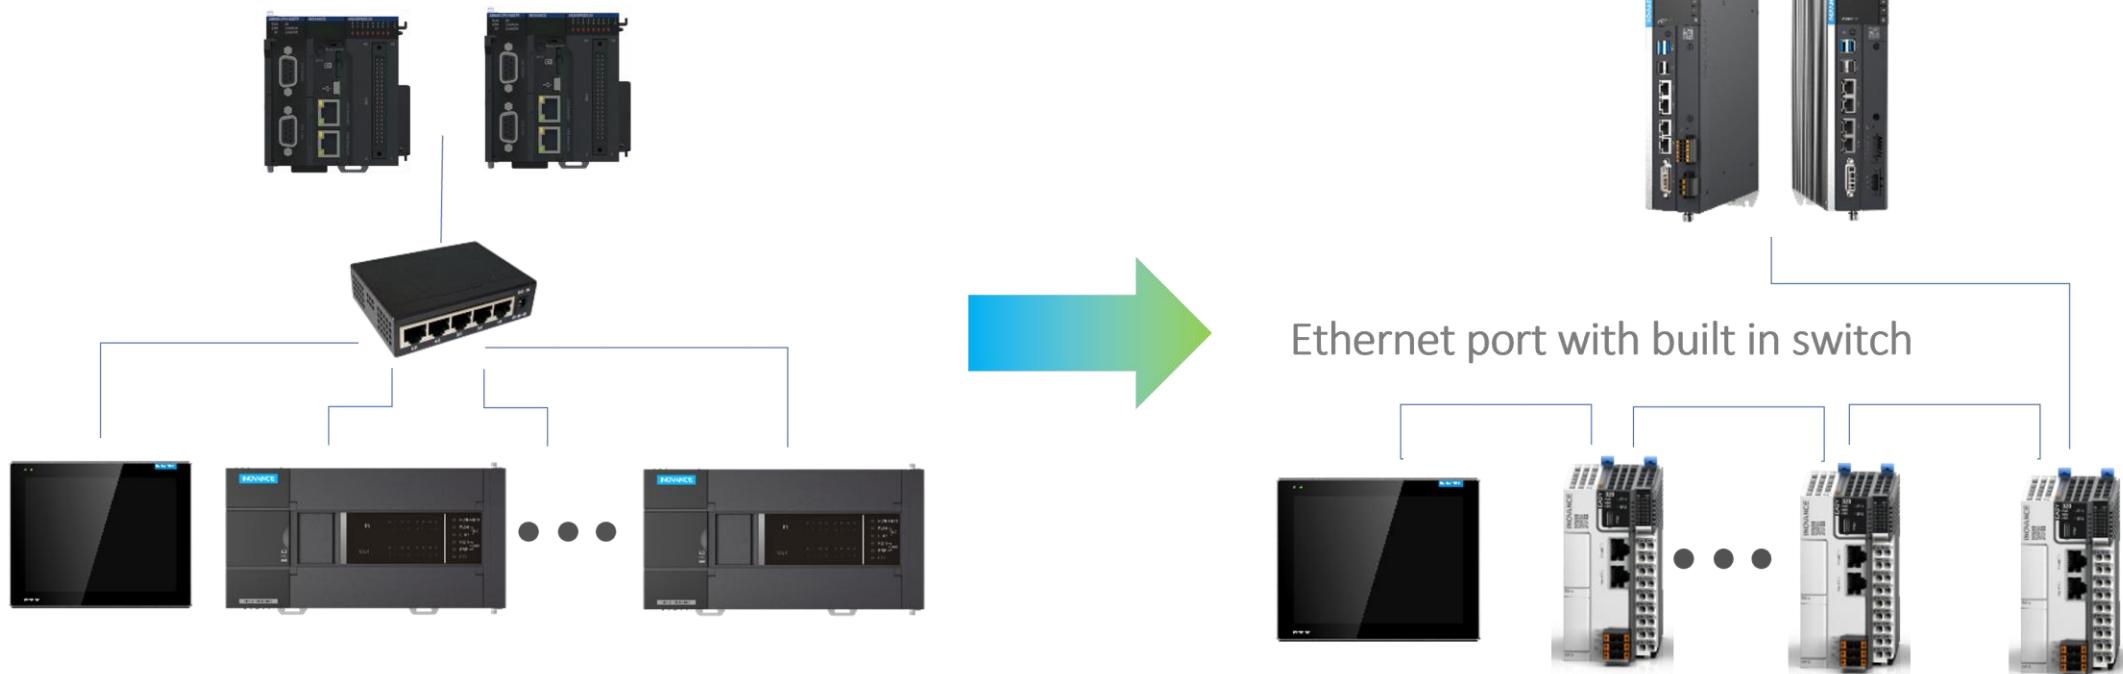

The collage includes several screenshots of the programming environment:

- A code snippet in ST language:

```

8 IF (Save_Dispenser_Start = BOOL#TRUE) THEN
9   Using_Product.Dispense_Begin_Pos[0]:=X_A
10  Using_Product.Dispense_Begin_Pos[1]:=Y_A
11 END_IF;
12
14 IF (Save_Left_Start = BOOL#TRUE) THEN
15   Using_Product.Mark_Pos_Left[0]:=X_ACT_Po
16   Using_Product.Mark_Pos_Left[1]:=Y_ACT_Po
17 END_IF;
18
20 IF (Save_Right_Start = BOOL#TRUE) THEN
21   Using_Product.Mark_Pos_Right[0]:=X_ACT_F
22

```
- A Project Manager window showing I/O assignments and a ladder logic diagram for Net 1.
- A Function Block Instances window showing a block labeled 'FB_Customized' with parameters param_1, param_2, and param_3.
- A dialog box for loading a contact, showing the expression 'Load NO contact[1/1] LD Contact [Contact] BOOL'.
- A variable table window showing parameters for a function block, including 'param_3(DINT)', 'param_1(BOOL)', and 'param_2(BOOL)'.

Traditional Solution:

One master + switch + multi slaves

Disadvantage: need extra switch, and there is limitation for the connection quantities

New Solution:

One master +~~switch~~+ multi slaves

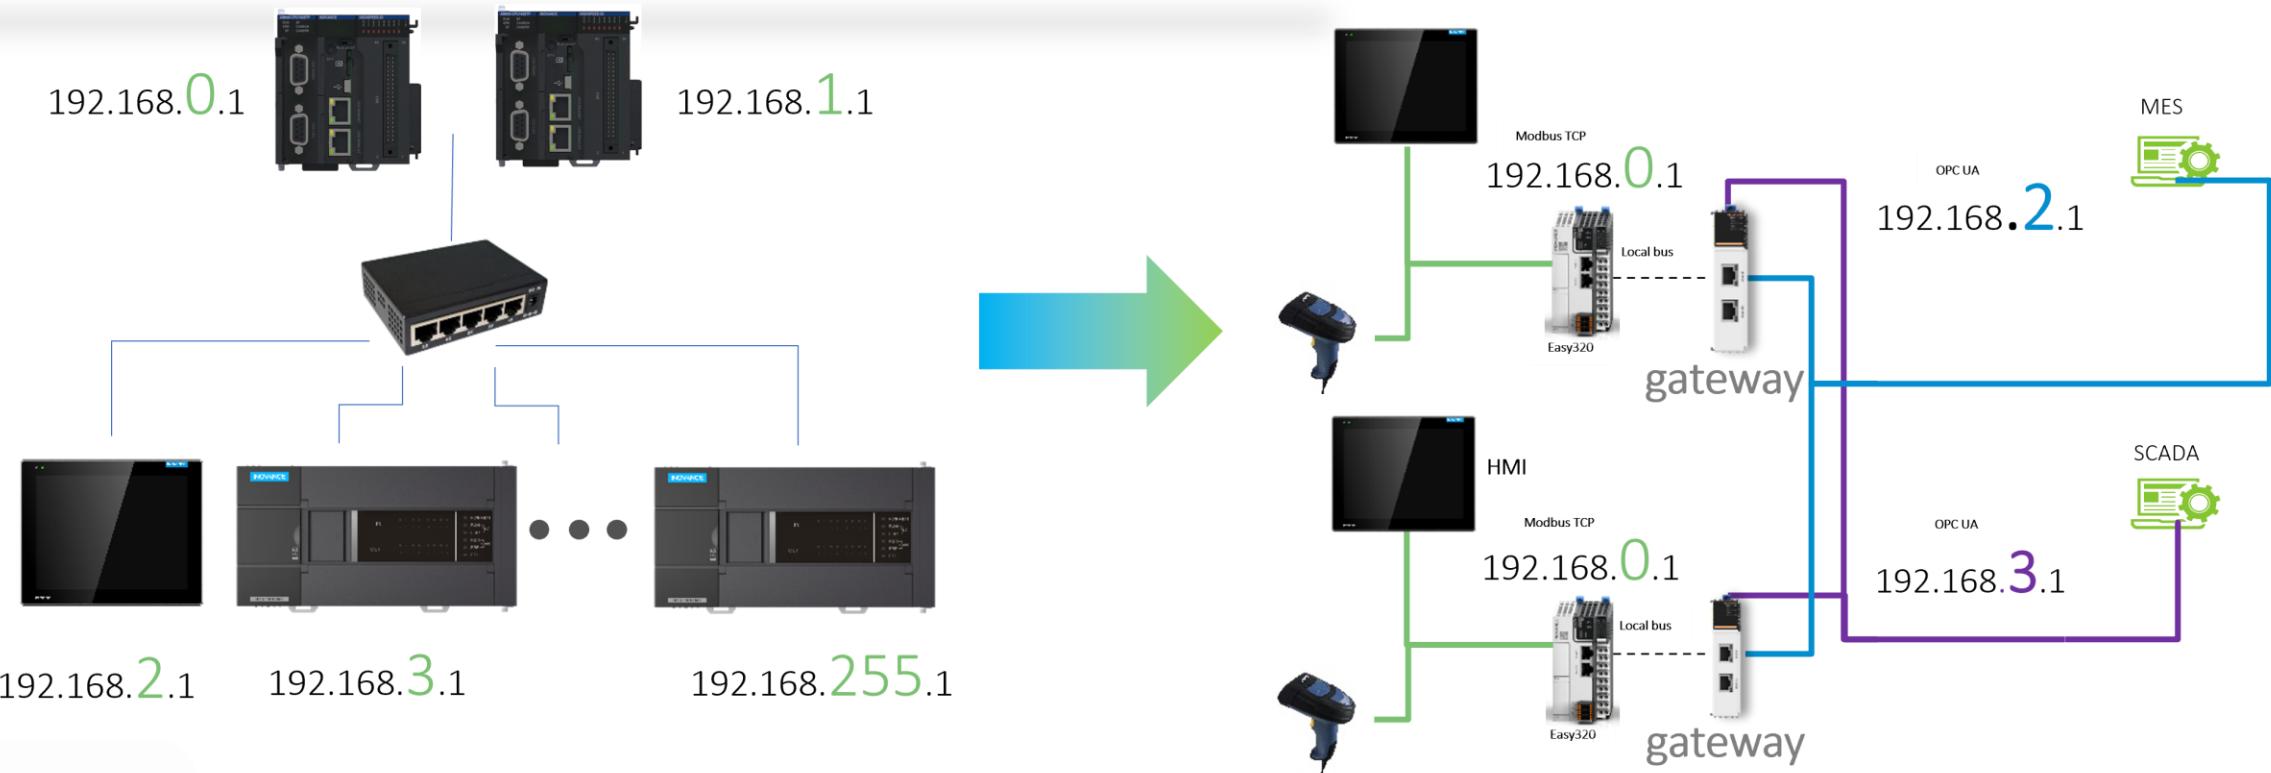

Advantage: no need extra switch, and there is no limitation for the connection quantities

* need consider the max slaves that master can support

Easy Series PLC features – IP extension using gateway module

INOVANCE

Many device on site, the control port/programming port is **mixed** with communication port

Control layer is **safely separated** with information interactive layer via using difference IP address

Gateway module to expense IP address, realize the isolation of info layer and control layer

*Gateway module is expected to be available at end of 2022

Power input				DC24V				

GL/GE 20 Expansion modules

GL20 expansion modules

INOVANCE

The GL20 series is a high performance remote terminal control system, which realizes remote monitoring and data acquisition of equipment through real-time reliable industrial ethernet bus. The compact design ensures more I / O interfaces for smaller product volumes; the plug type and extractable structure allow users to more efficiently complete module assembly or replacement tasks without any tools, removable terminal design allows users to maintain without rewiring, greatly saving installation and maintenance time.

GL20 expansion modules – Features

INOVANCE

- Great performance with ultra fast response
- More stable and reliable designation
- Compact size and wiring without tool
- Abundant variants used for different system

Great performance with ultra fast response

- Microsecond level response
- Synchronous control

Compact size and wiring without tool

- Compact size
- Fast installation
- Fast replacement

- Stable connection
- Gold plating process
- Safety and reliability

More stable and reliable designation

Abundant variants used for different system

- Multiple protocol
- Abundant variants

NEW Generation Distributed I/O System

Controller: SIEMENS S7-2XX/S7-12XX/S7-15XX

GL20-RTU-ECTA

Item	Description
Size(WxHxD:mm)	24×100×83
Max extended modules	16
Protection	Over current/reverse connection protection
Temperature	-20~55°C
Ambient humidity	Less than 95% and no condensation
IP level	IP20
Power supply	24Vdc

Features

- Non-volatile configuration parameters
- Type C port for firmware upgrading
- Fault diagnosis for each channel
- Output modules support software filter
- Flexible PDO setting to support 1bit/8bit/16bit variable(0016/1600 modules)
- EtherCAT supported
- Min cycle of coupler is up to 125 microsecond

EtherCAT® 

GL20 expansion module – Profibus bus coupler, GL20-RTU-RN

INOVANCE

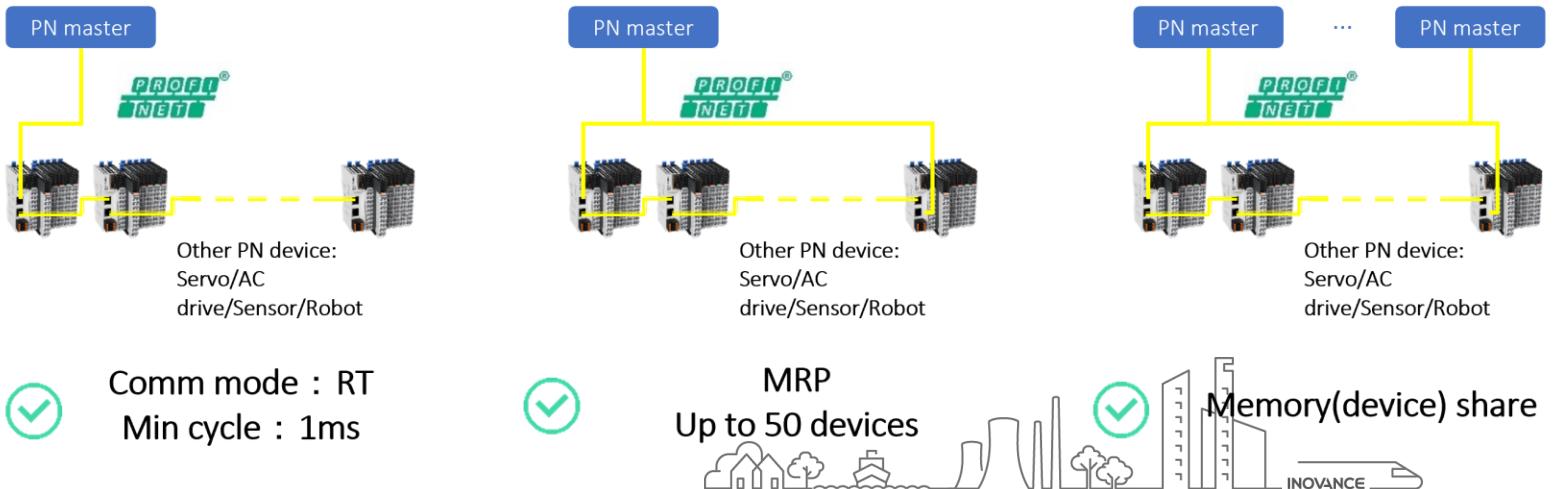

GL20-RTU-PN

*TAKE NOTE PN coupler is
not available for now

Item	Description
Size(WxHxD:mm)	24×100×83
Max extended modules	16
Protection	Over current/reverse connection protection
Operation temperature	-20~55°C
Ambient humidity	Less than 95% and no condensation
IP level	IP20
Memory(device) share	
Process data	I/O 1440 bytes
RT	Yes, up to 1ms cycle
Fast start up	
MRP(Medium redundancy protocol)	
Ethernet port	2 x RJ45
Communication rate	10/100M, full duplex
Transmission distance	100 meters

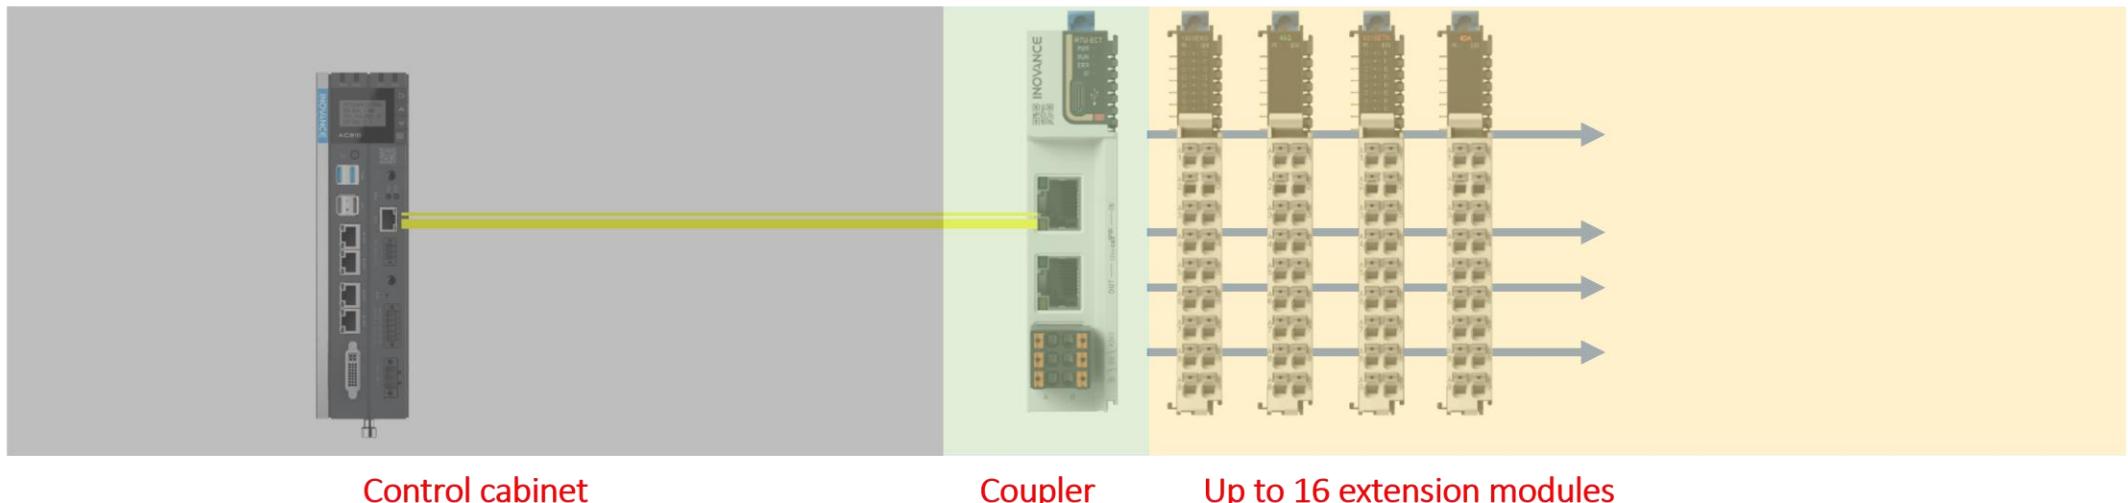

GL20 expansion module – Topology

INOVANCE

NO NEED extra coupler while use with Easy CPUs

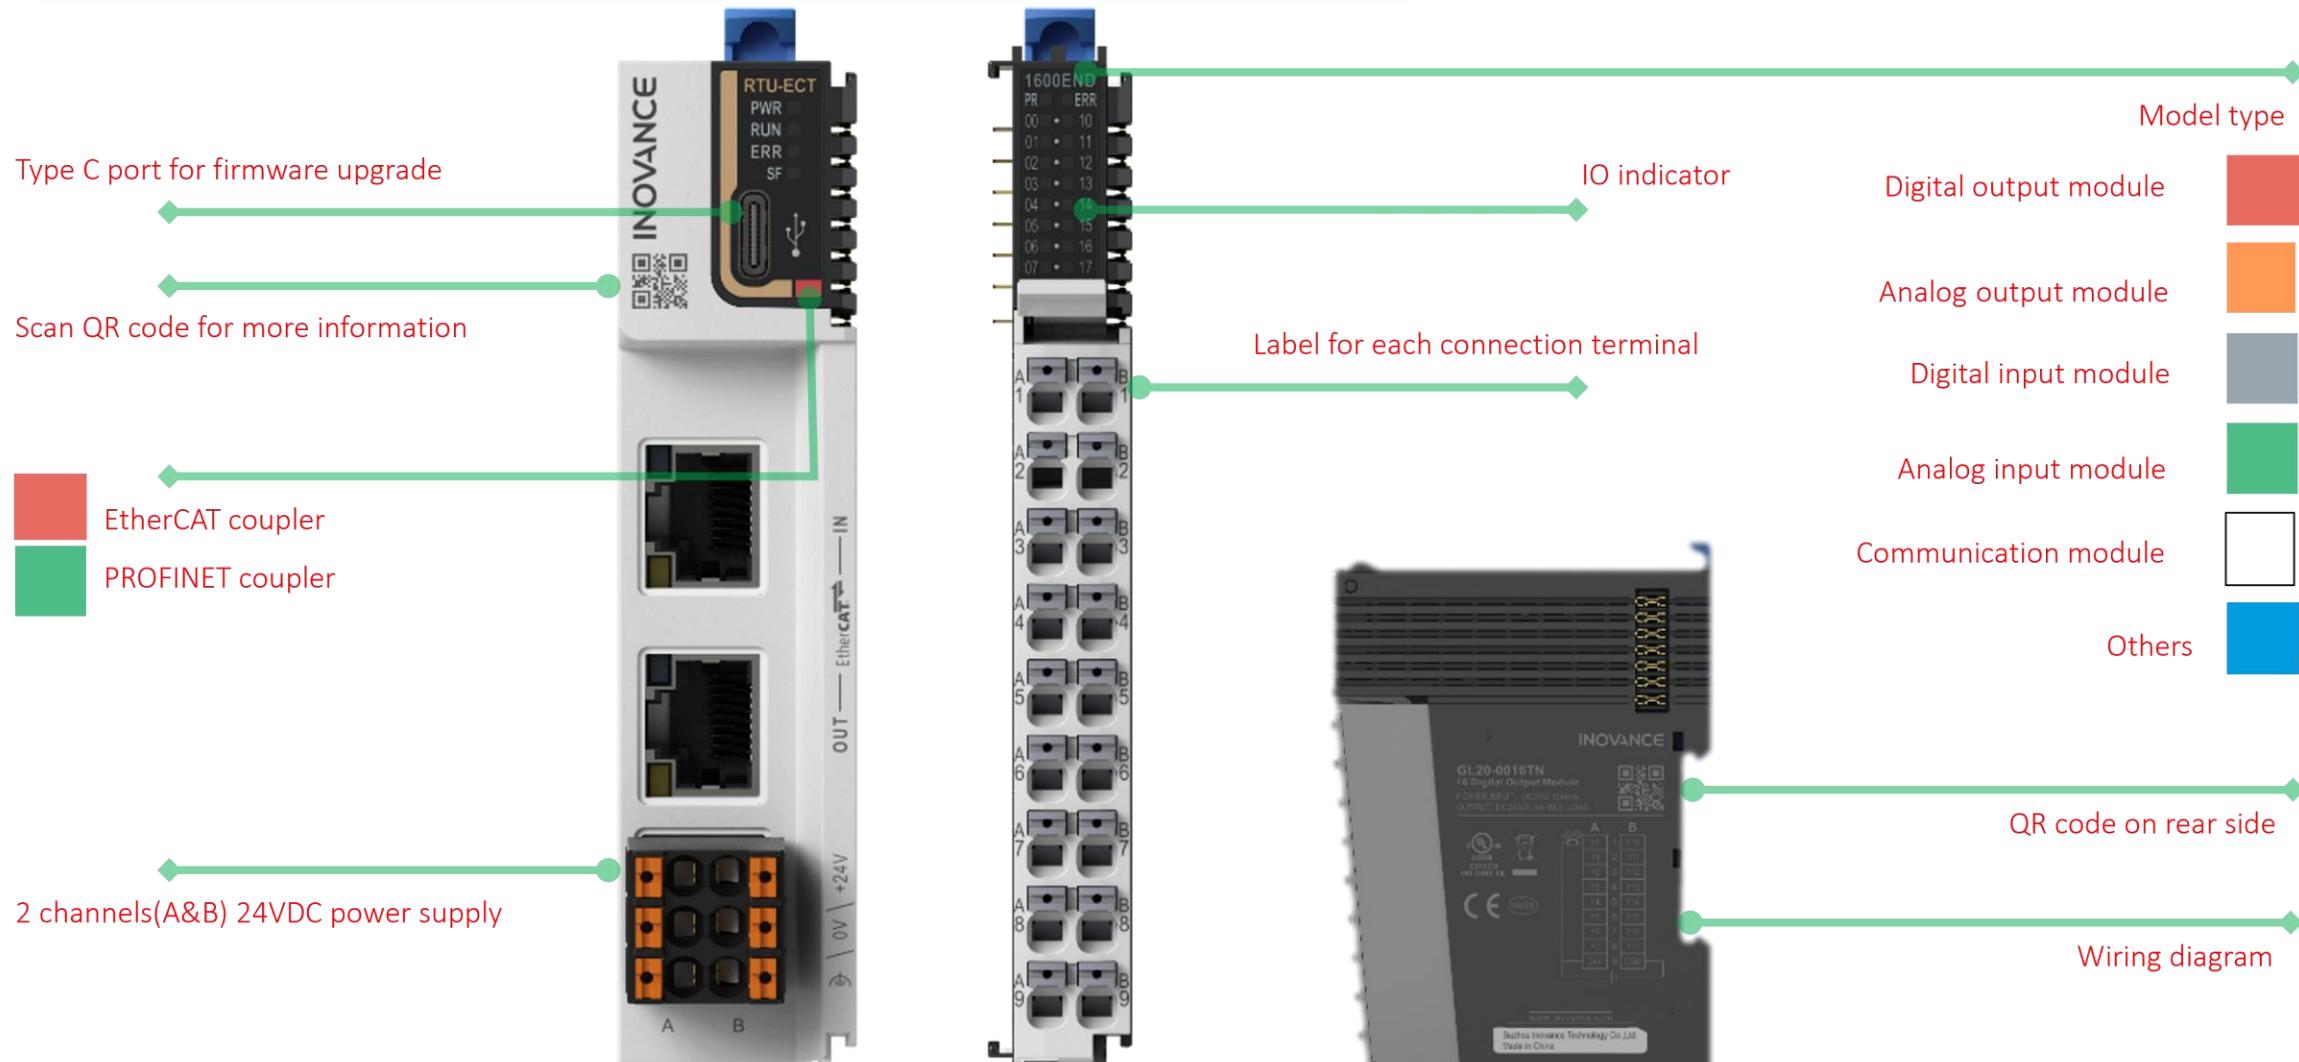

NEED extra coupler(EtherCAT/PN) while use with other CPUs

GL20 expansion modules – Appearance, Common indicators

INOVANCE

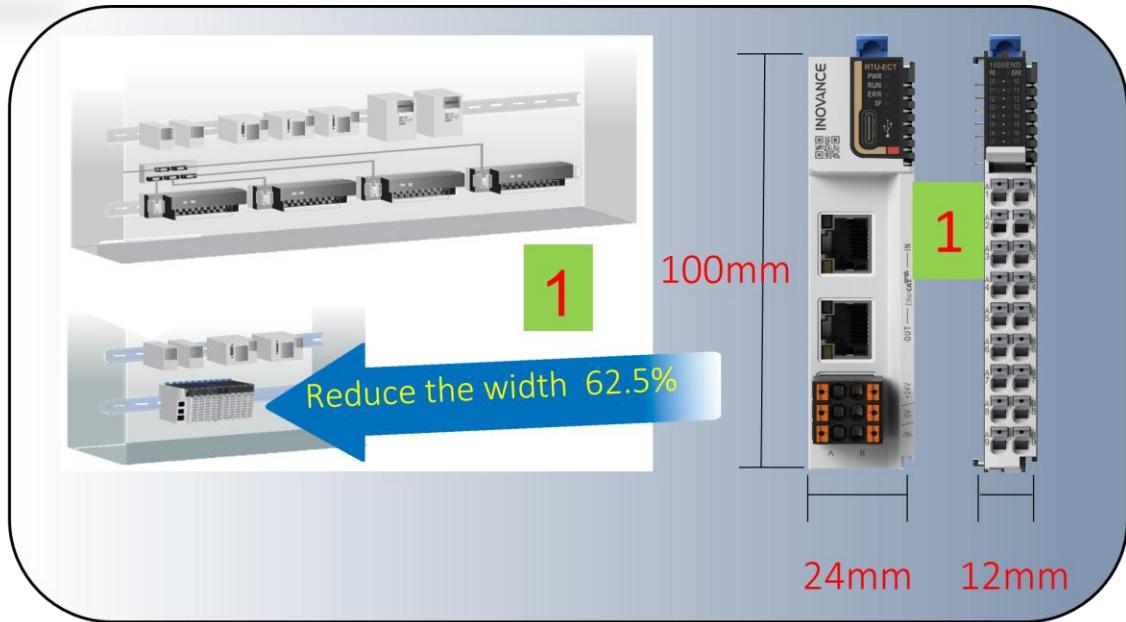

1. Compact Size

- Up to 12mm width, blade type structure
- Save 2/3 cabinet installation space

2. Faster installation

- Support vertically plug in-out, save **76%** Installation time cost
- The installation time for GL10 modules is around 120 seconds/per module whereas the time for GL20 is around **20 seconds**/per module
- Push in spring clamp type terminal, wiring without any extra tool
- Allow for a larger wire diameter, 5% larger than competitors(1.5mm)

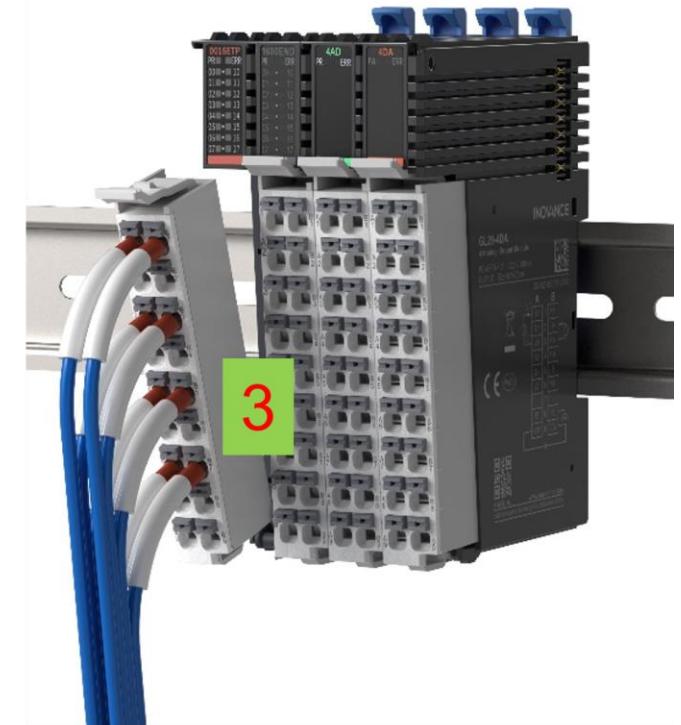

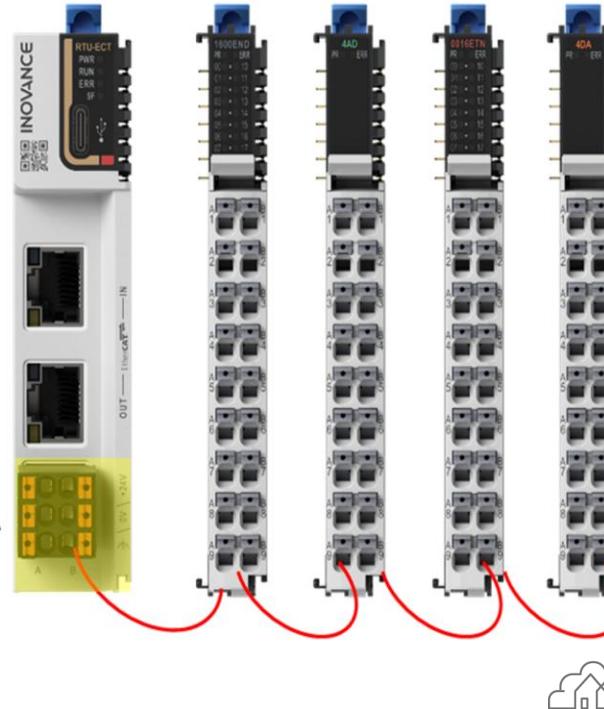

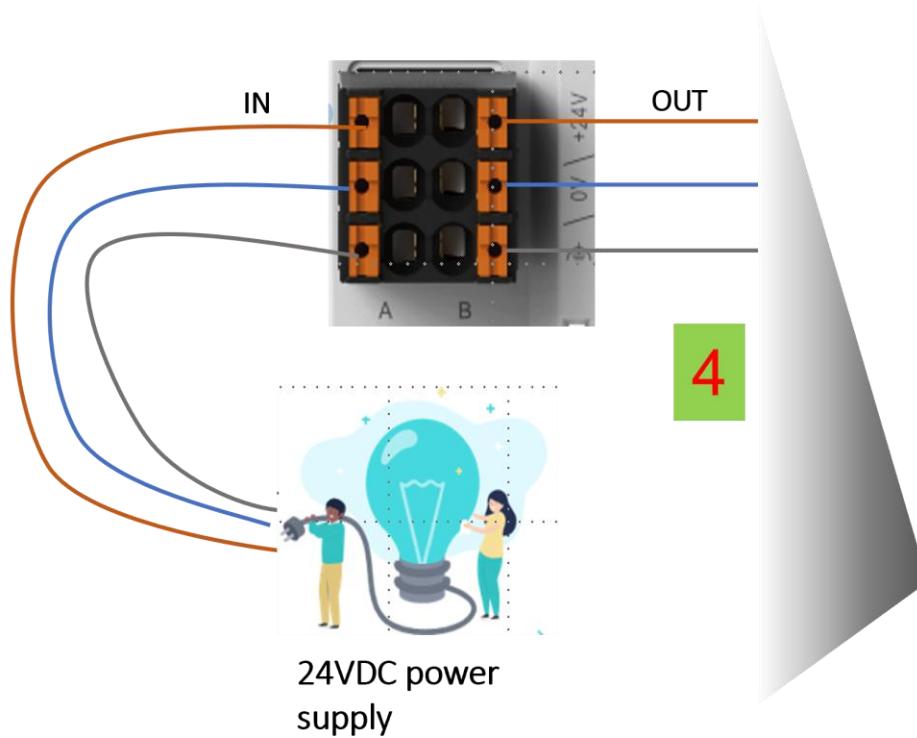

3. Removable terminal

- Dedicated **removable** spring type terminal

4. Easy connection for power supply

- Integrated 2 channels(A/B) 24VDC power supply terminal, NO NEED extra PSU module

5. More stable and reliable connection

- Dual side clamping designation improve stability and reliability

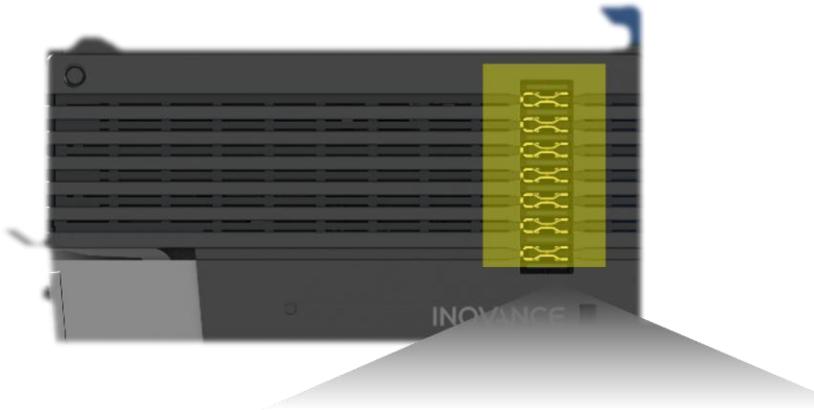

Competitor A

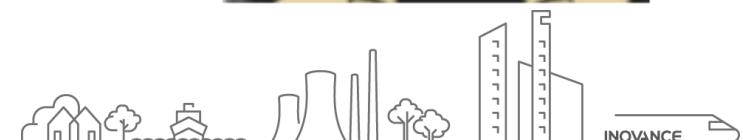

Competitor B

NOT ALLOW to touch the metal spring connection plate

The connection clamp is INSIDE the slot to prevent users to touch the connector, and the GOLD PLATING PROCESS to improve the corrosion resistance

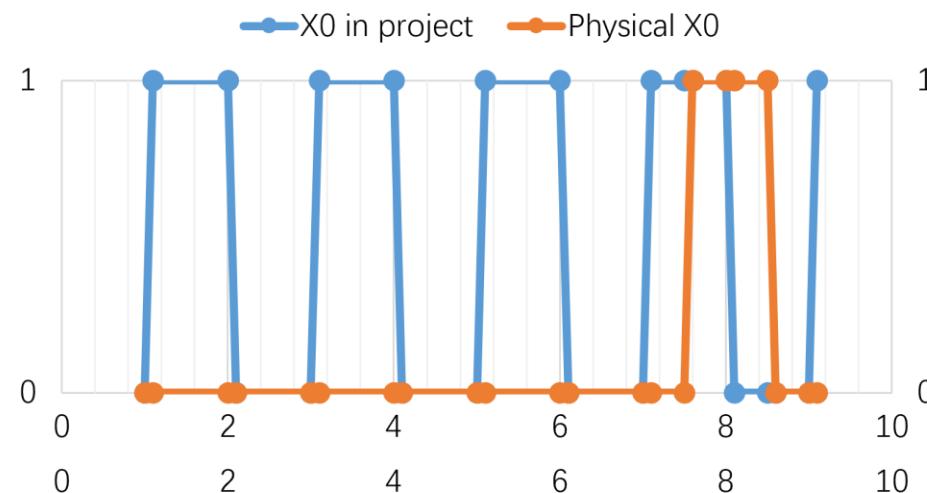

6. Faster response

- IOs in project are **synchronous** with physical IOs (with an execution cycle over 500 microsecond)

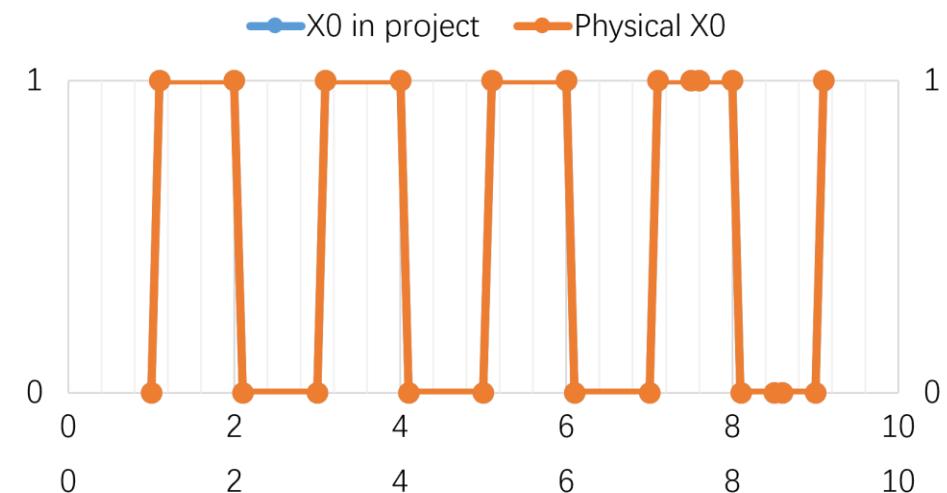

GL10 Modules

asynchronous refresh

GL20 Modules—up to 125 microsecond cycle

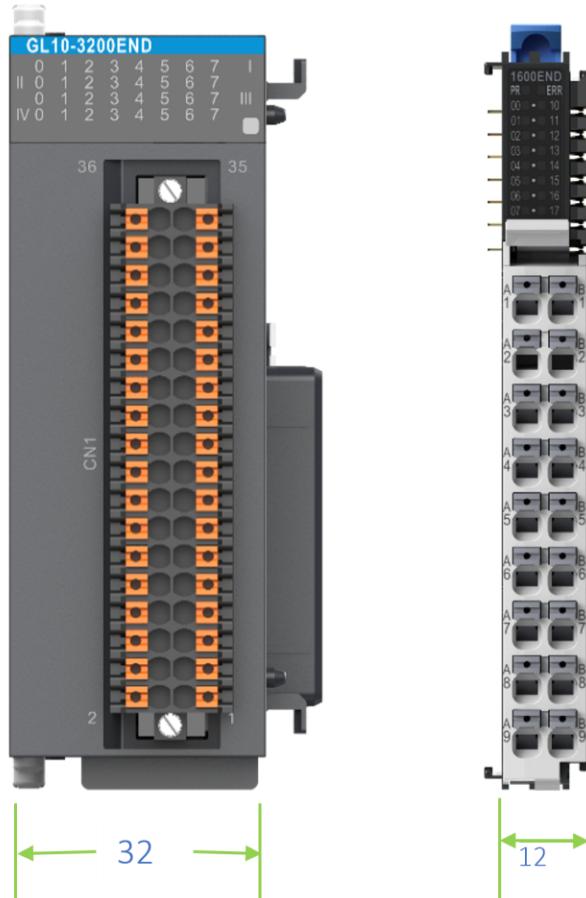

synchronous refresh

GL20 expansion modules – Comparison with GL10 modules

INOVANCE

GL10 Modules	GL20 Modules
Larger size	compact size to save installation space
Screw type terminal	Push in spring clamp type terminal
need extra PSU	no need extra PSU, 2 channels power supply terminal(1 x IN/1 x OUT)
pinhole type connection terminal	dual side clamp type connection terminal with gold plating process, much more stable and reliable
mini B port for firmware upgrade	type C port for firmware upgrade
need to remove modules horizontally to uninstallation/replacement	plug in-out in vertical direction directly, no need extra operation

- Local bus communication rate up to 100Mbps, **10 times higher than GL10**
- DI/Os hardware response time within 100 microsecond
- AI/Os capture cycle up to 62.5 microsecond

GL20 expansion modules	
Power supply module	
GL20-PS2	NOT available for now, PSU module
Digital inputs modules	
GL20-0800END	8 x sink/source digital inputs module, spring clamp
GL20-1600END	16 x sink/source digital inputs module, spring clamp
GL20-3200END	NOT available for now, expected trial test at Nov, 2022
Digital outputs modules	
GL20-0008ETN	8 x sink transistor outputs module, spring clamp
GL20-0008ETP	8 x source transistor outputs module, spring clamp
GL20-0008ER	8 x relay outputs module, spring clamp
GL20-0016ER	NOT available for now
GL20-0016ETN	16 x sink transistor outputs module, spring clamp
GL20-0016-ETP	16 x source transistor outputs module, spring clamp
GL20-0032ETN	NOT available for now, expected trial test at Nov, 2022
Digital inputs/outputs modules	
GL20-0808ETN	8 x inputs + 8 x outputs, NPN, spring clamp
GL20-3232ETN	NOT available for now. 32 x inputs + 32 x outputs, NPN, NEED extra connection cable or terminals, expected trial test at Nov, 2022
Analog inputs/outputs modules	
GL20-4AD	4 x analog inputs module, spring clamp
GL20-4DA	4 x analog outputs module, spring clamp
Temperature detection modules	
GL20-4PT	4 x thermal resistor temperature detection module, spring clamp
GL20-4TC	NOT available for now, expected trial test at Nov, 2022
EtherCAT coupler module	
GL20-RTU-ECT	EtherCAT (auto scan) communication module, RJ45 LAN port
PROFINET coupler module	
GL20-RTU-PN	ProfiNET communication module
Communication module	
GL20-2S485-N	NOT available for now, 2 channels RS485 communication module, expected trial test at Nov, 2022

GL20 – Expansion modules specification

INOVANCE

ECT coupler	Power input	Rated current	Dimensions (W*H*D)	Take note
GL20-RTU-ECT	DC24V	0.6A	24*100*75mm	NOT compatible with GL10 modules

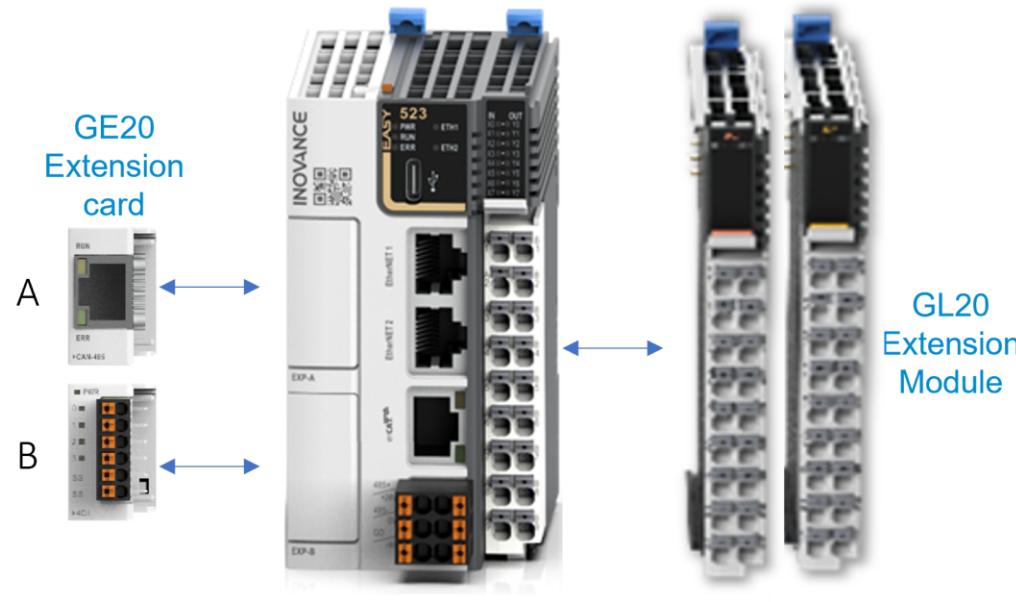

IO modules	Input / Output	Power input	Hardware response time(ON/OFF)	Others	Dimensions(W*H*D)
GL20-0016ETN	16 channels sink output	DC24V	100us/100us	Short circuit/over current protection	12*100*75mm
GL20-1600END	16 channels sink/source output	DC24V	100us/100us	Adjustable filter time	12*100*75mm
GL20-0016ETP	16 channels source output	DC24V	100us/100us	Short circuit/over current protection	12*100*75mm

Analog input modules	Input / Output	Power input	Capture cycle	Input accuracy (25°C)	Voltage input range	Current input range	Dimensions (W*H*D)
GL20-4AD	4 channels analog inputs	DC24V	125us/2 channels	±0.1% (full range)	±10V, 0-10V, ±5V, 0-5V	±20mA, 0-20mA, 4-20mA	12*100*75mm

Analog input modules	Input / Output	Power input	Capture cycle	Input accuracy (25°C)	Voltage input range	Current input range	Dimensions (W*H*D)
GL20-4DA	4 channels analog outputs	DC24V	125us/2 channels	±0.1% (full range)	±10V, 0-10V, ±5V, 0-5V, 1-5V	0-20mA, 4-20mA	12*100*75mm

*Easy series can only use GL20 modules with local bus extension, to use GL10 modules, need an EtherCAT coupler GL10-RTU-ECT

- RS485 connection recommend not over 31 slaves
- CANopen support up to 62 slaves
- CANlink support up to 62 slaves
- Modbus TCP support up to 32 slaves(work as client/master)
- Modbus TCP support up to 16 master(work as server/slave)
- Support up to 3 serial port(including extension card)

Appearance

Model	GE20-4DO-TN
Description	4 channels output module
Slot	A/B
IP level	IP20
Operation temperature	-20 °C~55 °C
Output type	digital transistor
source/sink(PNP/NPN)	sink(NPN)
Channel	4
Output voltage	24V DC (20.4V DC~26.4V DC)
Output(resistance load)	0.5A/point, 1A/common point
Output(inductance load)	6w/24V DC (in total)
Output(lamp load)	1w/24V DC (in total)
Hardware ON/OFF response	within 100us
Leakage current(ON->OFF)	10uA below
Frequency	resistance load: 100Hz, inductance load: 0.5Hz, lamp load: 10Hz
Isolation	opto-isolation
Protection function	Surge suppression

Appearance

Model	GE20-4DI
Description	4 channels input module
Slot	A/B
IP level	IP20
Operation temperature	-20 °C~55 °C
Input type	digital transistor
source/sink(PNP/NPN)	source/sink
Channel	4
Input voltage	24V DC±10% (21.6V DC~26.4V DC)
Input resistance	5.6kΩ
ON current	>3.5mA
OFF current	<1.5mA
Input response	≈15ms (hardware RC filter)
ON voltage	≥15V DC
OFF voltage	≤5V DC
Software filter	NOT support
Isolation	opto-isolation
